

PROGRAMME SPECIFIC OBJECTIVE:

The objective of the BCA programme is to prepare students for a career in software design, development and testing as well as IT support by training them in the core and emerging areas of computer applications.

**BCA (Bachelor of Computer Applications)
Semester-III**

Course Type	Subject Code	Subject Title	Theory/ Practical	Credits	Weekly Contact Hours	Exam Duration	Marking Scheme		
							Internal	External	Total
Discipline Specific Course Core(Major)	US03MABCA01	Fundamentals of Data Structures	T	4	4	2:30	50	50	100
	US03MABCA02	Database Management Systems - I	T	4	4	2:30	50	50	100
	US03MABCA03	Practical based on US03MABCA01 and US03MABCA02	P	4	8	3:00	50	50	100
Interdisciplinary	US03IDBCA04	Web Application Development -III	T	2	2	1:30	25	25	50
	US03IDBCA05	Web Application Development–III Lab	P	2	4	1:30	25	25	50
Ability Enhancement Course	US03AEBCA06	Discrete Mathematics	T	2	2	1:30	25	25	50
Skill Enhancement Course	US03SEBCA07	E - Commerce	T	2	2	1:30	25	25	50
IKS	US03IKBCA01	Dharmshashtra (Aacharasamhita)	T	2	2	1:30	25	25	50

BCA (Bachelor of Computer Applications)

BCA (Semester-III)

Course Code	US03MABCA01	Title of the Course	Fundamentals of Data Structures
Total Credits of the Course	4	Hours per Week	4

Course Objectives:	<ol style="list-style-type: none"> 1. To study the fundamental concepts about data structures. 2. To learn the basics of arrays, stacks, queues, trees, and linked lists. 3. To understand the concepts related to sorting and searching techniques.
--------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Course Content		
Unit	Description	Weightage* (%)
1.	<p>Introduction to Data Structures</p> <ul style="list-style-type: none"> – Introduction to data structures - Definition, Types of Data Structures, applications and advantages – Primitive and non-primitive data structures and operations on them – Introduction to arrays, one and two-dimensional arrays – Representation of arrays in memory: row-major and column-major order – Address calculation of elements of one and two-dimensional arrays – Applications of arrays 	25
2.	<p>Stack and Queues</p> <ul style="list-style-type: none"> – Introduction – Operations on the Stack- Push, Pop, Peep, Change – Applications of Stacks – Infix, Postfix, Prefix Notations – Conversion: Infix to Postfix – Types of queues : Simple queues, Circular queues, Double ended queues, Priority Queue – Applications of Queues – Operations on Simple Queues : Insert and Delete 	25

3.	Introduction to Trees <ul style="list-style-type: none"> - Definitions of basic terms : Tree, Directed Tree, Root, Leaf, Branch, Level, Node, Forest - Applications of a tree - Binary trees : introduction, linear and linked representations - Traversals of a binary tree: Preorder, Inorder and Postorder - Types of binary trees : Full Binary Tree, Complete Binary Tree, Binary Search Tree 	25
4.	Linked Lists, Sorting and Searching techniques <ul style="list-style-type: none"> - Introduction to linked lists - Types of linked lists: Singly linked lists, Doubly linked lists, Circular linked lists, Circular Doubly linked list - Operations on Singly Linked Lists: Insertion: at Front, Deletion: from Beginning - Introduction to Sorting and Searching - Sorting techniques - Bubble Sort and Merge Sort - Searching techniques - Sequential Search and Binary Search 	25

Teaching-Learning Methodology	Blended learning approach incorporating both traditional classroom teaching as well as usage of ICT tools.
-------------------------------	------------------------------------------------------------------------------------------------------------

Evaluation Pattern		
Sr. No.	Details of the Evaluation	Weightage
1.	Internal Evaluation	50%
2.	University Examination	50%

Course Outcomes: Having completed this course, the learner will be able to	
1.	understand the fundamental concepts of various data structures.
2.	gain knowledge on arrays, stacks, queues, trees, and linked lists.
3.	understand the basic concepts of sorting and searching techniques.

BCA (Bachelor of Computer Applications)

BCA (Semester-III)

Course Code	US03MABCA02	Title of the Course	Database Management Systems - I
Total Credits of the Course	4	Hours per Week	4

Course Objectives:	<ol style="list-style-type: none"> 1. To study the basic concepts related to DBMS, Data Models and Relational Data Model terminologies. 2. To understand basics of SQL data types, SQL statements and concepts like DML, DDL, DCL, TCL. 3. To learn working with tables, applying and modifying constraints, functions, joins queries.
--------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Course Content		
Unit	Description	Weightage* (%)
1.	<p>Introduction to DBMS and Relational Database Design</p> <ul style="list-style-type: none"> - Basics of Database and DBMS (Data, Information, field, record, file) - Three level Architecture of Database- external, conceptual and internal - Data Models concepts: Hierarchical, Network and Relational - Relation data models concept, terminologies: tuple, attribute, domain, relation (Definition) - Relationships and Relationship types - Keys: Introduction: super key, candidate key, primary key, alternate key, foreign key - Dr. E.F. Codd Rules - Consequences of Poor database design and Functional dependencies - Difference between DBMS and RDBMS - Normal Forms: 1st Normal Form, 2nd Normal Form, 3rd Normal Form - Examples of normalization 	25

2.	<p>Structured Query Language-1</p> <ul style="list-style-type: none"> – SQL - introduction , advantages and disadvantages – Data types – Types of SQL Statements : DDL DML ,DCL, TCL – Working with SQL*Plus – overview and basic commands of SQL Plus. – Tables: Creation, Removal and Alteration – Table Data: insertion, selection, updation, deletion – Filtering data using WHERE clause, ordering using ORDER BY – Pseudo Columns – ROWID, ROWNUM, USER, UID, SYSDATE – Transaction control language statements – COMMIT, ROLLBACK and SAVEPOINT 	25
3.	<p>Structured Query Language-2</p> <ul style="list-style-type: none"> – Operators – Arithmetic, Relational, Logical, Range Searching, Pattern Matching – Null Values, Tab Table, Dual Table – Data Constraints and its types – Modifying Constraints and Use of User_Constraints – Functions – Introduction, Types of Functions (Scalar And Aggregate) – Scalar : Numeric Functions , Character Functions, Date Functions Conversion Functions – Aggregate Functions : Avg, Count, Max, Min, Sum 	25
4.	<p>Structured Query Language-3</p> <ul style="list-style-type: none"> – Grouping using GROUP BY and HAVING – Subquery and its types – Joining tables, Types of joins – Creation and manipulation of database objects – indexes, views, sequences – Data control language statements – GRANT and REVOKE 	25

Teaching-Learning Methodology	Blended learning approach incorporating both traditional classroom teaching as well as usage of ICT tools.
-------------------------------	------------------------------------------------------------------------------------------------------------

Evaluation Pattern		
Sr. No.	Details of the Evaluation	Weightage
1.	Internal Evaluation	50%
2.	University Examination	50%

Course Outcomes: Having completed this course, the learner will be able to	
1.	understand the basic concepts associated with DBMS, Data Models and Relational Data Model terminologies.
2.	understand the basics of SQL data types, SQL statements and concepts like DML, DDL, DCL, TCL.
3.	gain knowledge on working with tables, applying and modifying constraints, functions, joins queries.

BCA (Bachelor of Computer Application)

BCA (Semester-III)

Course Code	US03MABCA03	Title of the Course	Practical based on US03MABCA01 and US03MABCA02
Total Credits of the Course	4	Hours per Week	8

Course Objectives:	<ol style="list-style-type: none"> 1. To understand the practical usage of data structures. 2. To understand the practical usage of Database Management Systems.
--------------------	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Course Content		
	Description	Weightage* (%)
	PART-A : Practical based on US03MABCA01	40%
	PART-B : Practical based on US03MABCA02	60%

Teaching-Learning Methodology	Practical-based learning in small groups and hands-on training through required ICT tools.
-------------------------------	--------------------------------------------------------------------------------------------

Evaluation Pattern		
Sr. No.	Details of the Evaluation	Weightage
1.	Internal Evaluation	50%
2.	University Examination	50%

Course Outcomes: Having completed this course, the learner will be able to	
1.	apply the knowledge of data structures.
2.	apply the knowledge of Database Management Systems.

BCA (Bachelor of Computer Applications)

BCA (Semester-III)

Course Code	US03IDBCA04	Title of the Course	Web Application Development-III
Total Credits of the Course	2	Hours per Week	2

Course Objectives:	<ol style="list-style-type: none"> 1. To learn the basic concepts associated with scripting. 2. To understand fundamentals regarding JavaScript development.
--------------------	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Course Content		
Unit	Description	Weightage* (%)
1.	<p>Basics of JavaScript</p> <ul style="list-style-type: none"> - JavaScript basics : Syntax, Data Types, Variables, Literals, Type Casting, Operators - User interaction through dialog boxes - Built-in functions - Flow Control statements: Decision-Making and Looping - Arrays - User-defined functions, 	50
2.	<p>Advanced JavaScript-II</p> <ul style="list-style-type: none"> - String Object (length, charAt, indexOf, substr, toLowerCase, toUpperCase), - Math Object (PI, abs, ceil, floor, max, mm, round) - Date Object (getDate, getDay, getFullYear, getMonth, getTime, getHours, getMinutes, getSeconds, setDate, setFullYear, setMonth, setTime, setHours, setMinutes, setSeconds) - Introduction to Document Object Model (DOM), DOM Hierarchy, Understanding objects & Collections in DOM, HTML Form Hierarchy - Accessing Form elements (Text, Radio, Checkbox, Dropdown, Button), Event handling 	50

Teaching-Learning Methodology	Usage of multiple teaching-learning approaches: lectures and discussion, exploration and inquiry, cooperative group work, demonstrations, and presentations
-------------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------

Evaluation Pattern		
Sr. No.	Details of the Evaluation	Weightage
1.	Internal Evaluation	50%
2.	University Examination	50%

Course Outcomes: Having completed this course, the learner will be able to	
1.	understand the basic concepts regarding scripting.
2.	understand the role of JavaScript in Web Application Development.

BCA (Bachelor of Computer Applications)
BCA (Semester-III)

Course Code	US03IDBCA05	Title of the Course	Web Application Development-III Lab
Total Credits of the Course	2	Hours per Week	4

Course Objectives:	<ol style="list-style-type: none"> To study practical use of scripting. To provide basic knowledge on practical usage of JavaScript in Web Application Development.
--------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Course Content		
	Description	Weightage* (%)
	Practical Based on Web Application Development – I	100%

Teaching-Learning Methodology	Practical-based learning in small groups and hands-on training through required ICT tools.
-------------------------------	--------------------------------------------------------------------------------------------

Evaluation Pattern		
Sr. No.	Details of the Evaluation	Weightage
1.	Internal Evaluation	50%
2.	University Examination	50%

Course Outcomes: Having completed this course, the learner will be able to	
1.	gain practical knowledge on scripting.
2.	gain practical knowledge on JavaScript in Web Application Development.

BCA (Bachelor of Computer Applications)

BCA (Semester-III)

Course Code	US03AEBCA06	Title of the Course	Discrete Mathematics
Total Credits of the Course	2	Hours per Week	2

Course Objectives:	<ol style="list-style-type: none"> 1. To study the basic concepts of Vectors and Matrices. 2. To understand fundamental concepts related to graph theory.
--------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Course Content		
Unit	Description	Weightage* (%)
1.	Vectors and Matrices <ul style="list-style-type: none"> – Dot product and Norm – Matrix addition and scalar multiplication – Matrix multiplication – Transpose of matrix – Square matrices: Diagonal, upper, lower triangular, symmetric, skew symmetric, orthogonal. – Determinants up to order. 	50
2.	Graph Theory <ul style="list-style-type: none"> – Definition of graph, multigraph – Degree of vertex, paths, subgraph, connected components – Cut point, bridge – Special graphs: complete, regular, bipartite. – Matrices and graphs – Planar graphs, maps and regions – Euler's formula – Colored graphs 	50

Teaching-Learning Methodology	Blended learning approach incorporating both traditional classroom teaching as well as usage of ICT tools.
-------------------------------	------------------------------------------------------------------------------------------------------------

Evaluation Pattern		
Sr. No.	Details of the Evaluation	Weightage
1.	Internal Evaluation	50%
2.	University Examination	50%

Course Outcomes: Having completed this course, the learner will be able to	
1.	understand the basic concepts related to Vectors and Matrices.
2.	understand the fundamental concepts about graph theory.

Syllabus effective from the Academic Year 2025-2026

2	<ol style="list-style-type: none"> 1. Forms of Dharma at present and kaliyug. 2. Importance of Aacharndharma. 3. Examples of various characteristics of Dharma in the life of scholars. 4. Introduction to the major Dharmashastras. 	50%
---	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----

Teaching-Learning Methodology	Lecture-cum-discussion, Group Discussion, Presentations, Seminars, tutorials, Research Exercises
-------------------------------	--------------------------------------------------------------------------------------------------

Evaluation Pattern		
Sr. No.	Details of the Evaluation	Weightage
1.	Internal Written / Practical Examination Internal Continuous Assessment in the form of Practical, Vivavoce, Quizzes, Seminars, Assignments, Attendance	30%
2.	University Examination	70%

Course Outcomes: Having completed this course, the learner will be able to	
1.	Identify the historical and cultural context of the word "Dharma" and explain its etymology and core meaning.
2.	Analyze the characteristics of Dharma and its manifestations in various aspects of human life, including personal ethics, social responsibilities, and spiritual practices.
3.	Evaluate the explanations of Dharma provided by eminent scholars and thinkers, and critically examine different perspectives on its interpretation and application.
4.	Recognize the importance of Dharma in guiding ethical decision-making, promoting harmony in relationships and communities, and fostering a just and compassionate society.
5.	Apply the concepts of Dharma to contemporary issues and challenges, demonstrating an understanding of the different forms of Dharma in present times, the significance of Aacharndharma, and the influence of Dharma in the lives of scholars and individuals who exemplify its principles.
